

Meath East

A Chara

I would suggest, that the commission, look at the advantages of replacing the present Meath East & Meath West, constituencies with a Meath North & Meath South Constituency division. It would be possible to do this by taking back in to the equation, the Laytown Bettystown Electoral district areas, that are now in Louth, and using the River Boyne as a natural divide, while at the same time keeping the county boundary intact.

These new Constituencies would be much better represented, as the population, of the Rural North Meath Constituency, have issues that are particular to their own geographic profile, while Meath South, a commuter belt, has many issues, that relate to the presence of our capital city on its doorstep.

Kind Regards

Bosco O Farrell
